**So, where does this all come from?
IBM Design Thinking**

IBM

Corporate Policy

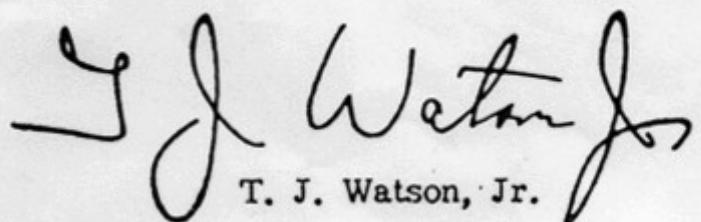

Number 123
December 20, 1966

SUBJECT: The Design Program

Good design is good business. Imaginative use of design helps to sell our products. Pleasant, efficient work areas contribute to better morale and productivity. Dramatic design in printed material increases its message impact.

The Vice President, Communications is responsible for co-ordinating all company design activities in architecture, interiors, displays, products, packaging and printed material.

Since design excellence concerns all areas of the business, you should make certain that all your people are aware of its importance.

T. J. Watson, Jr.

“There’s one key to our future growth:
the client experience.”

— Ginni Rometty

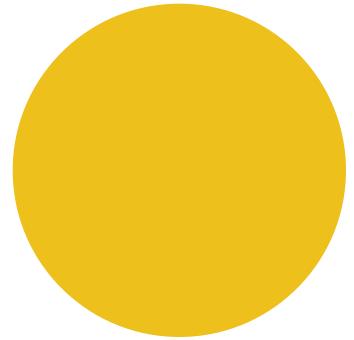

IBMI Design

Principles

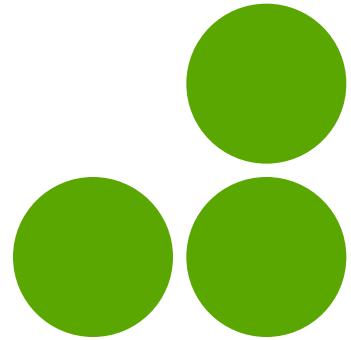

IBM Design Thinking

© 2016 IBM Corporation

A focus on user outcomes

When you use IBM Design Thinking, put your users' needs first.

Multidisciplinary teams

Collaborate across disciplines to move faster and work smarter.

Restless reinvention

Everything is a prototype. Listen, learn, and course-correct.

Understand user needs and deliver outcomes continuously

Observe >

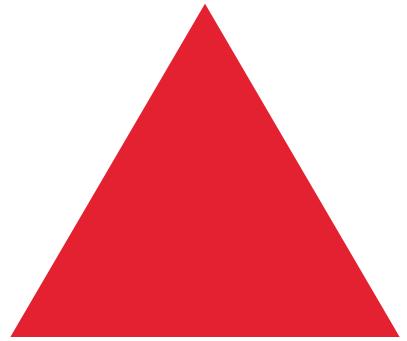

Get to know people, uncover their needs, test your ideas.

Reflect >

Build understanding, form intent, commit to decisions.

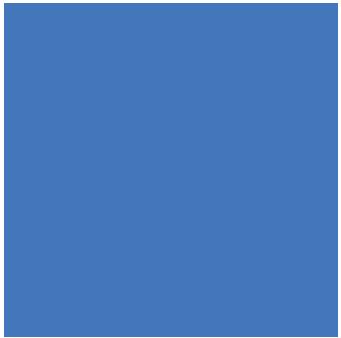

Make >

Explore ideas, prototype possibilities, drive outcomes.

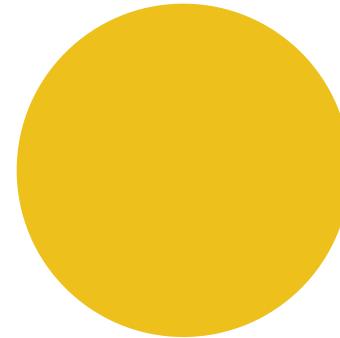

Hills

Align your team around specific, worthwhile outcomes to achieve.

Playbacks

Reflect together in a safe space to give and receive criticism.

Sponsor users

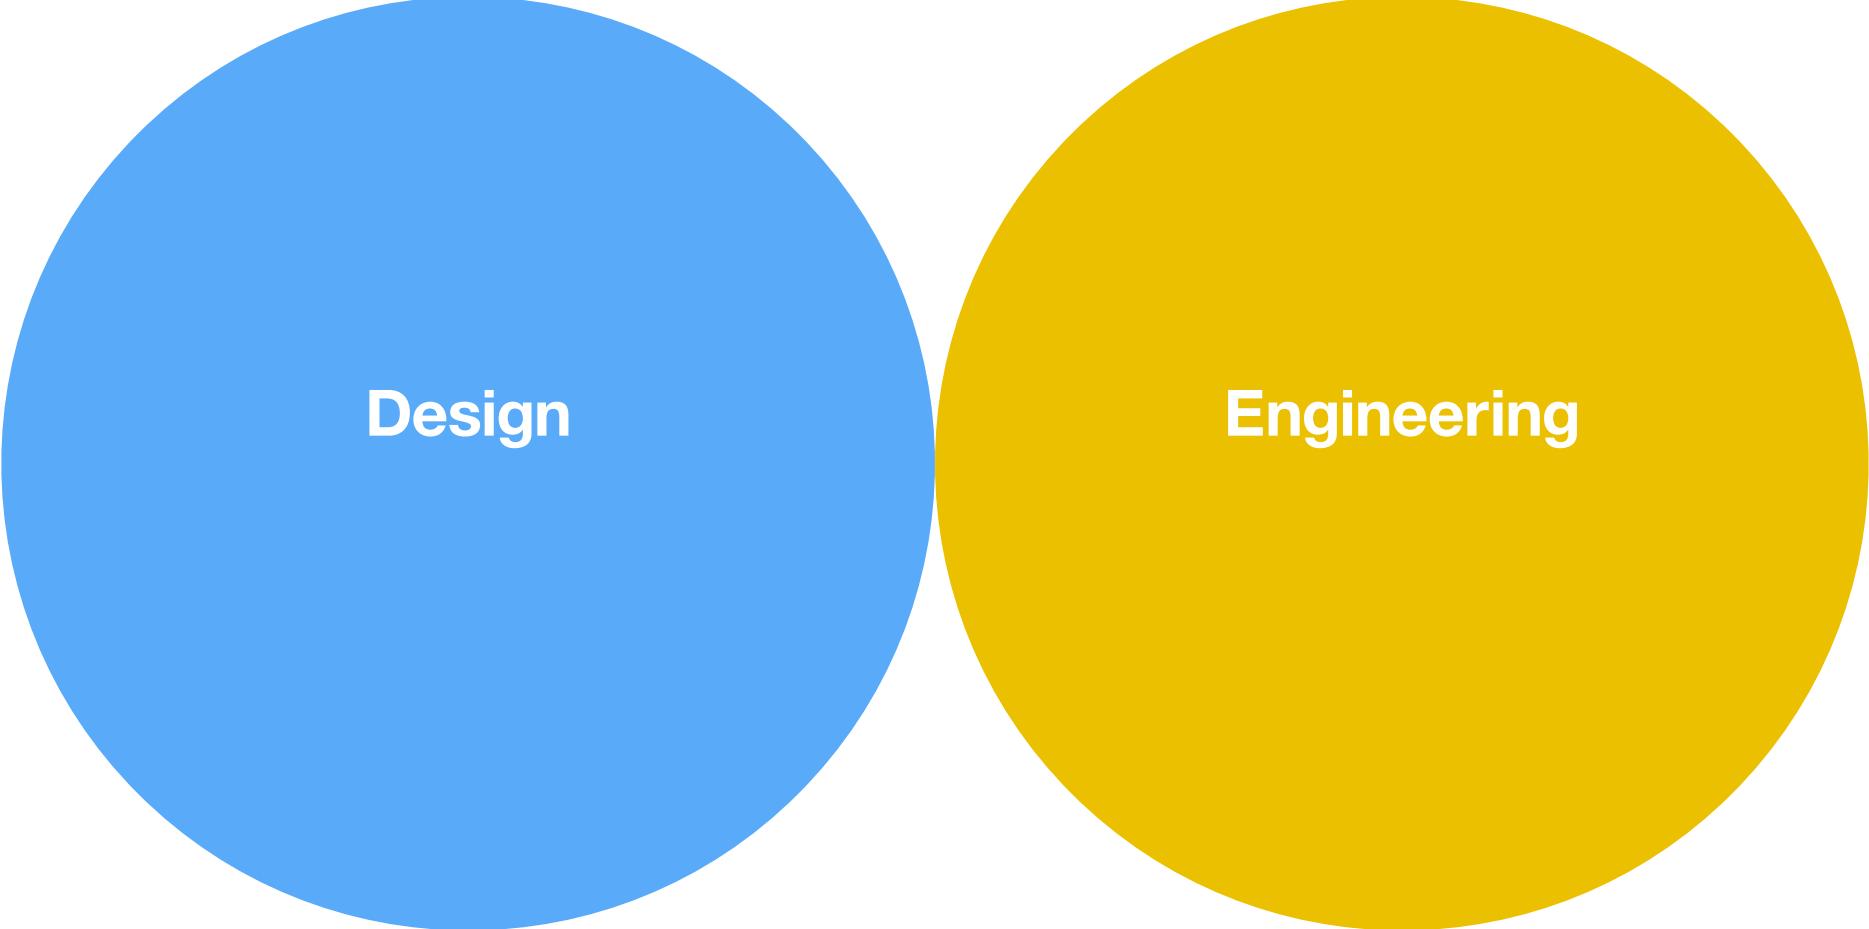

Give users a seat at the table. Invite them to observe, reflect, and make with you.

The Keys

IBM Design Thinking

Where do the front-end developers fit in?

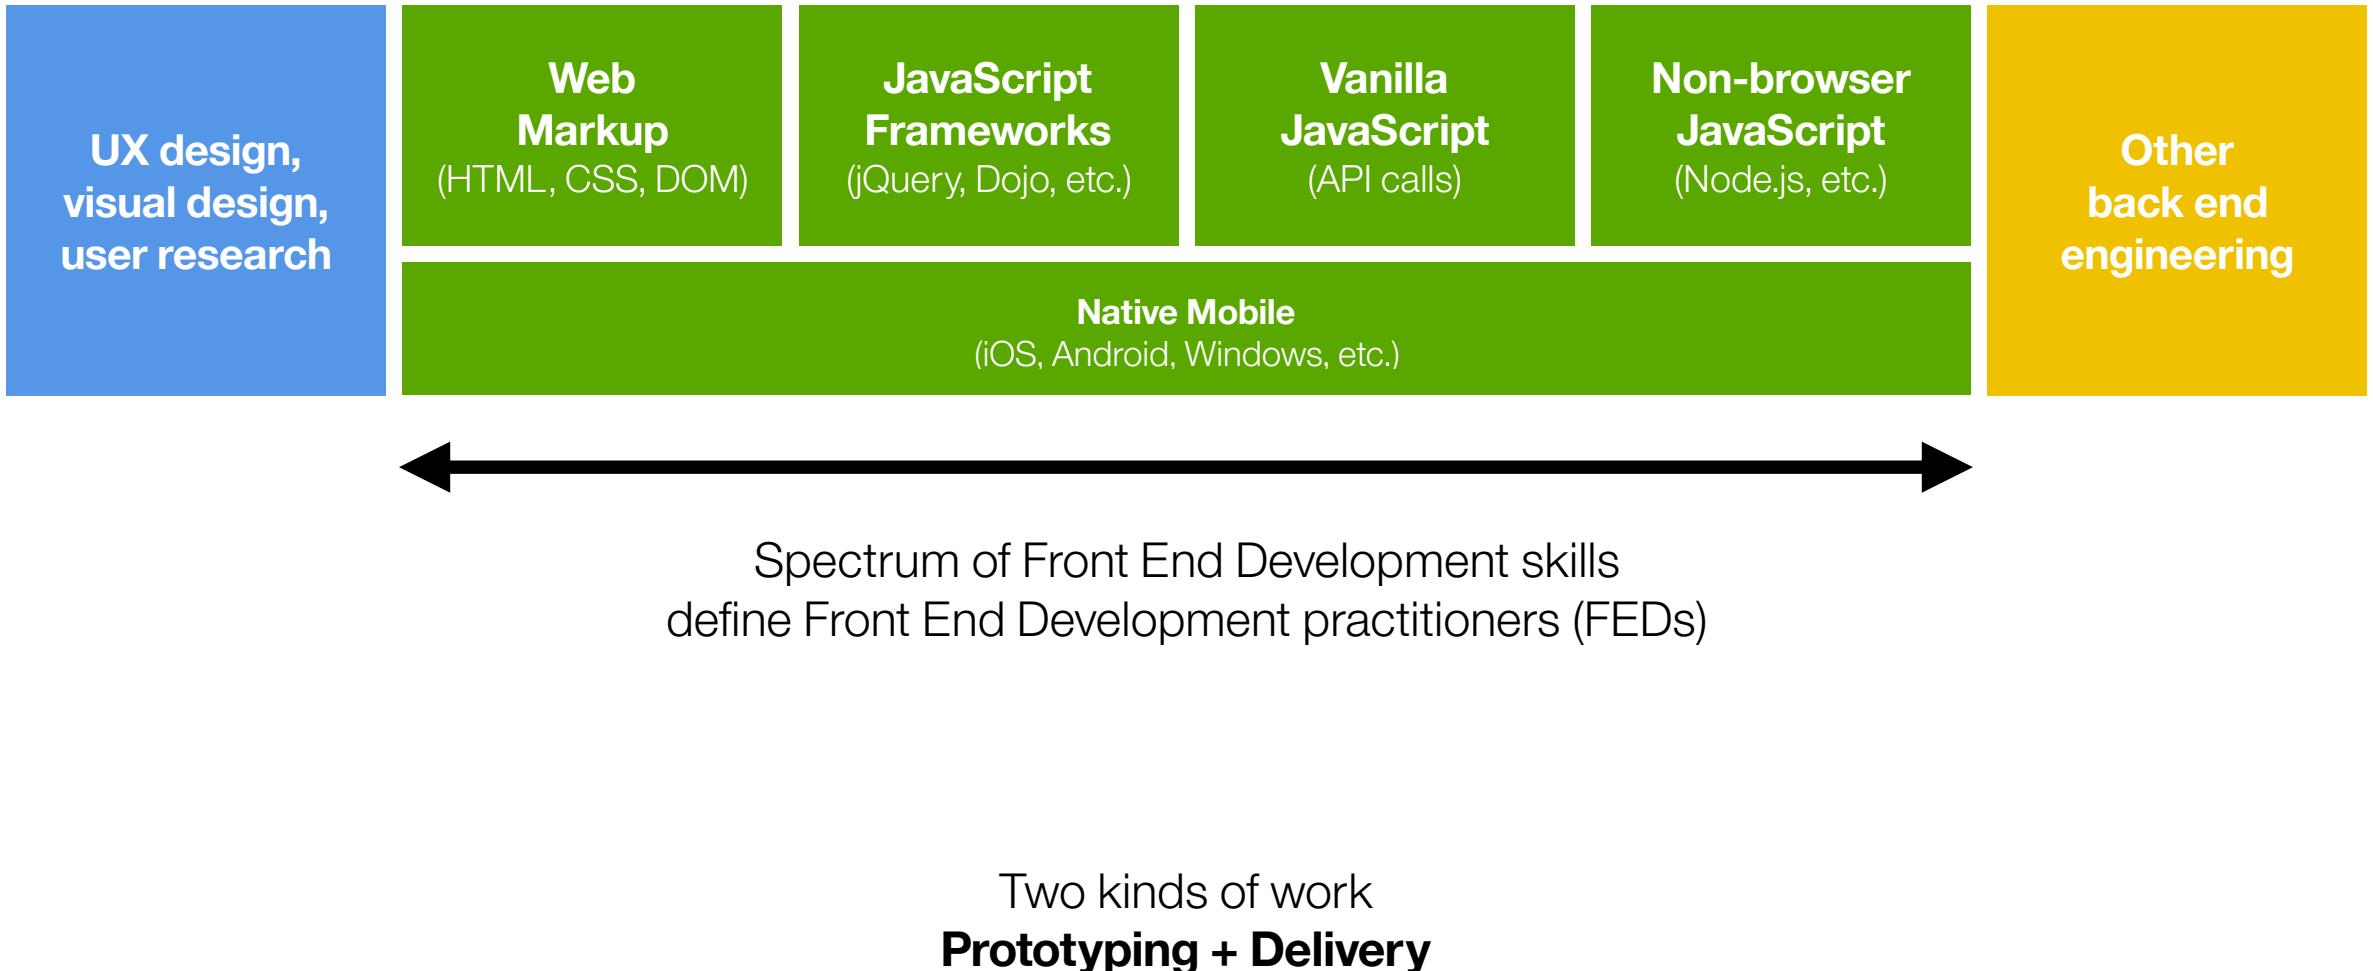

Design

Engineering

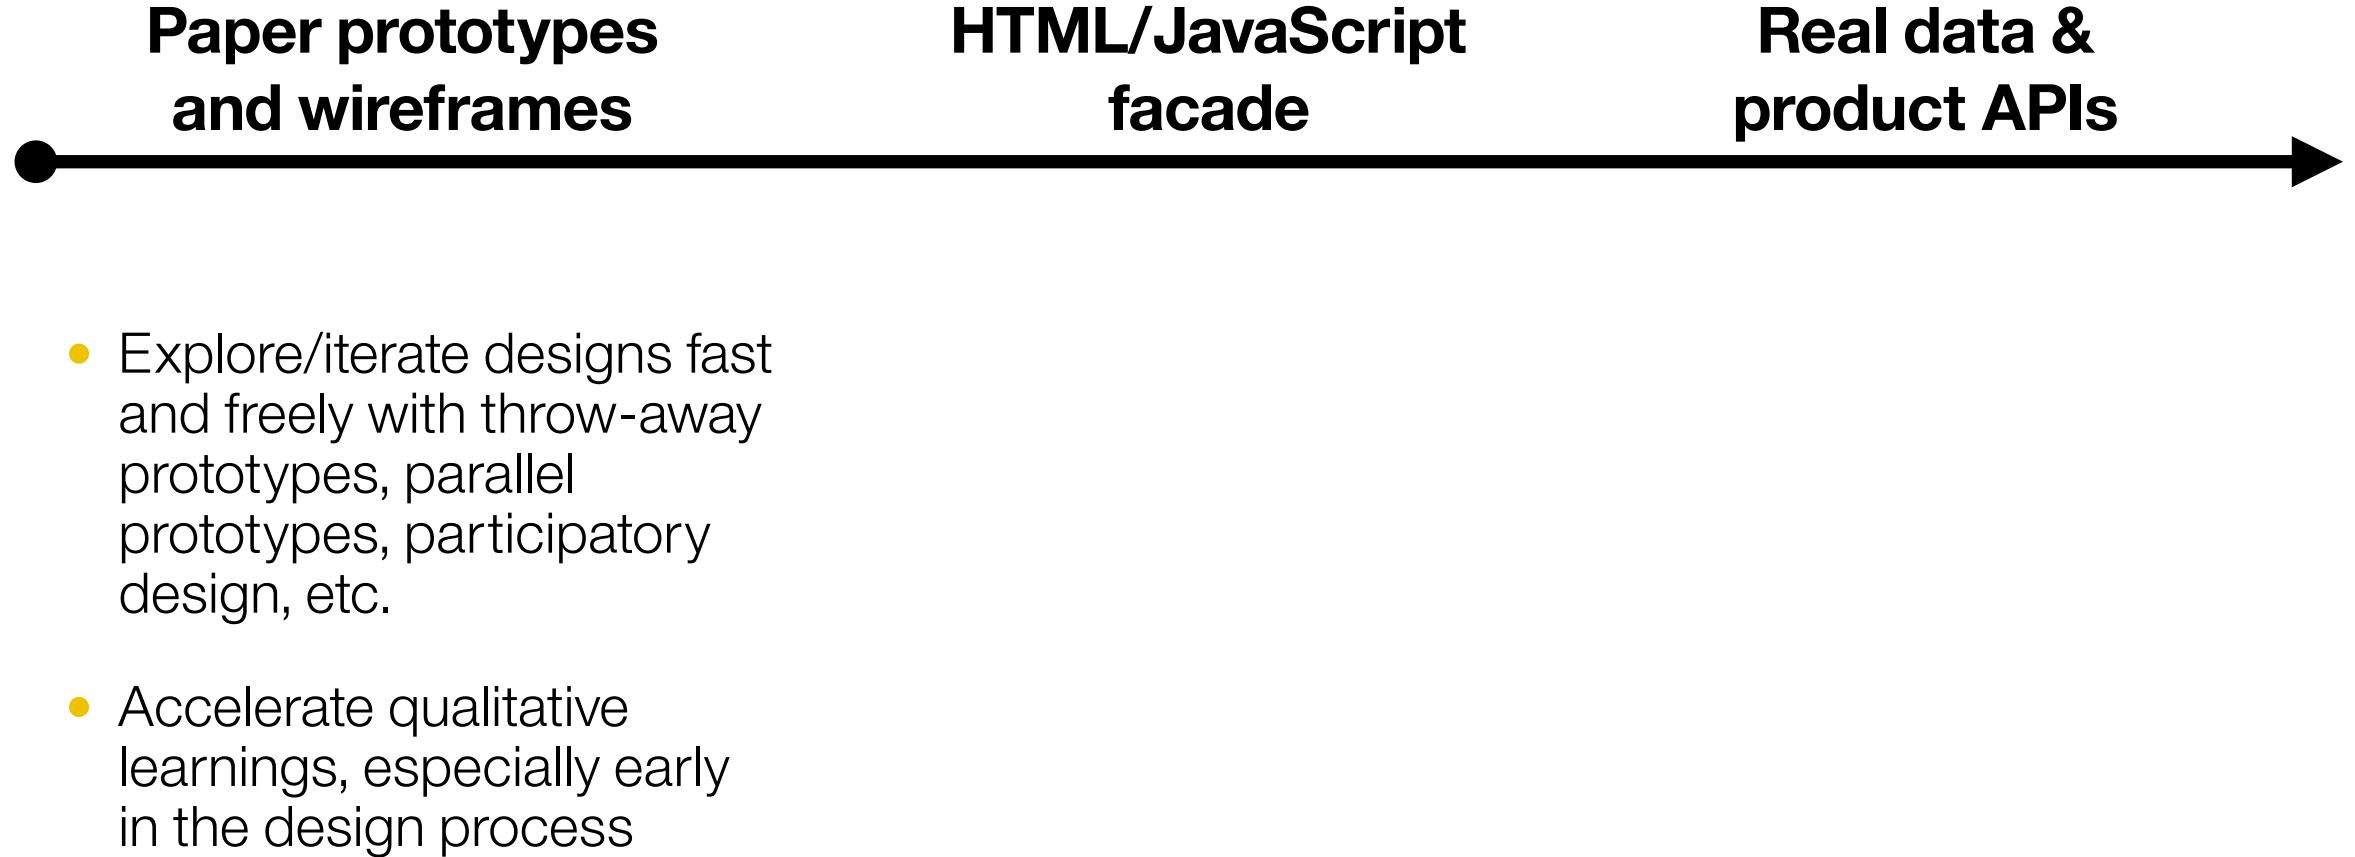

Defining Front-End Development at IBM

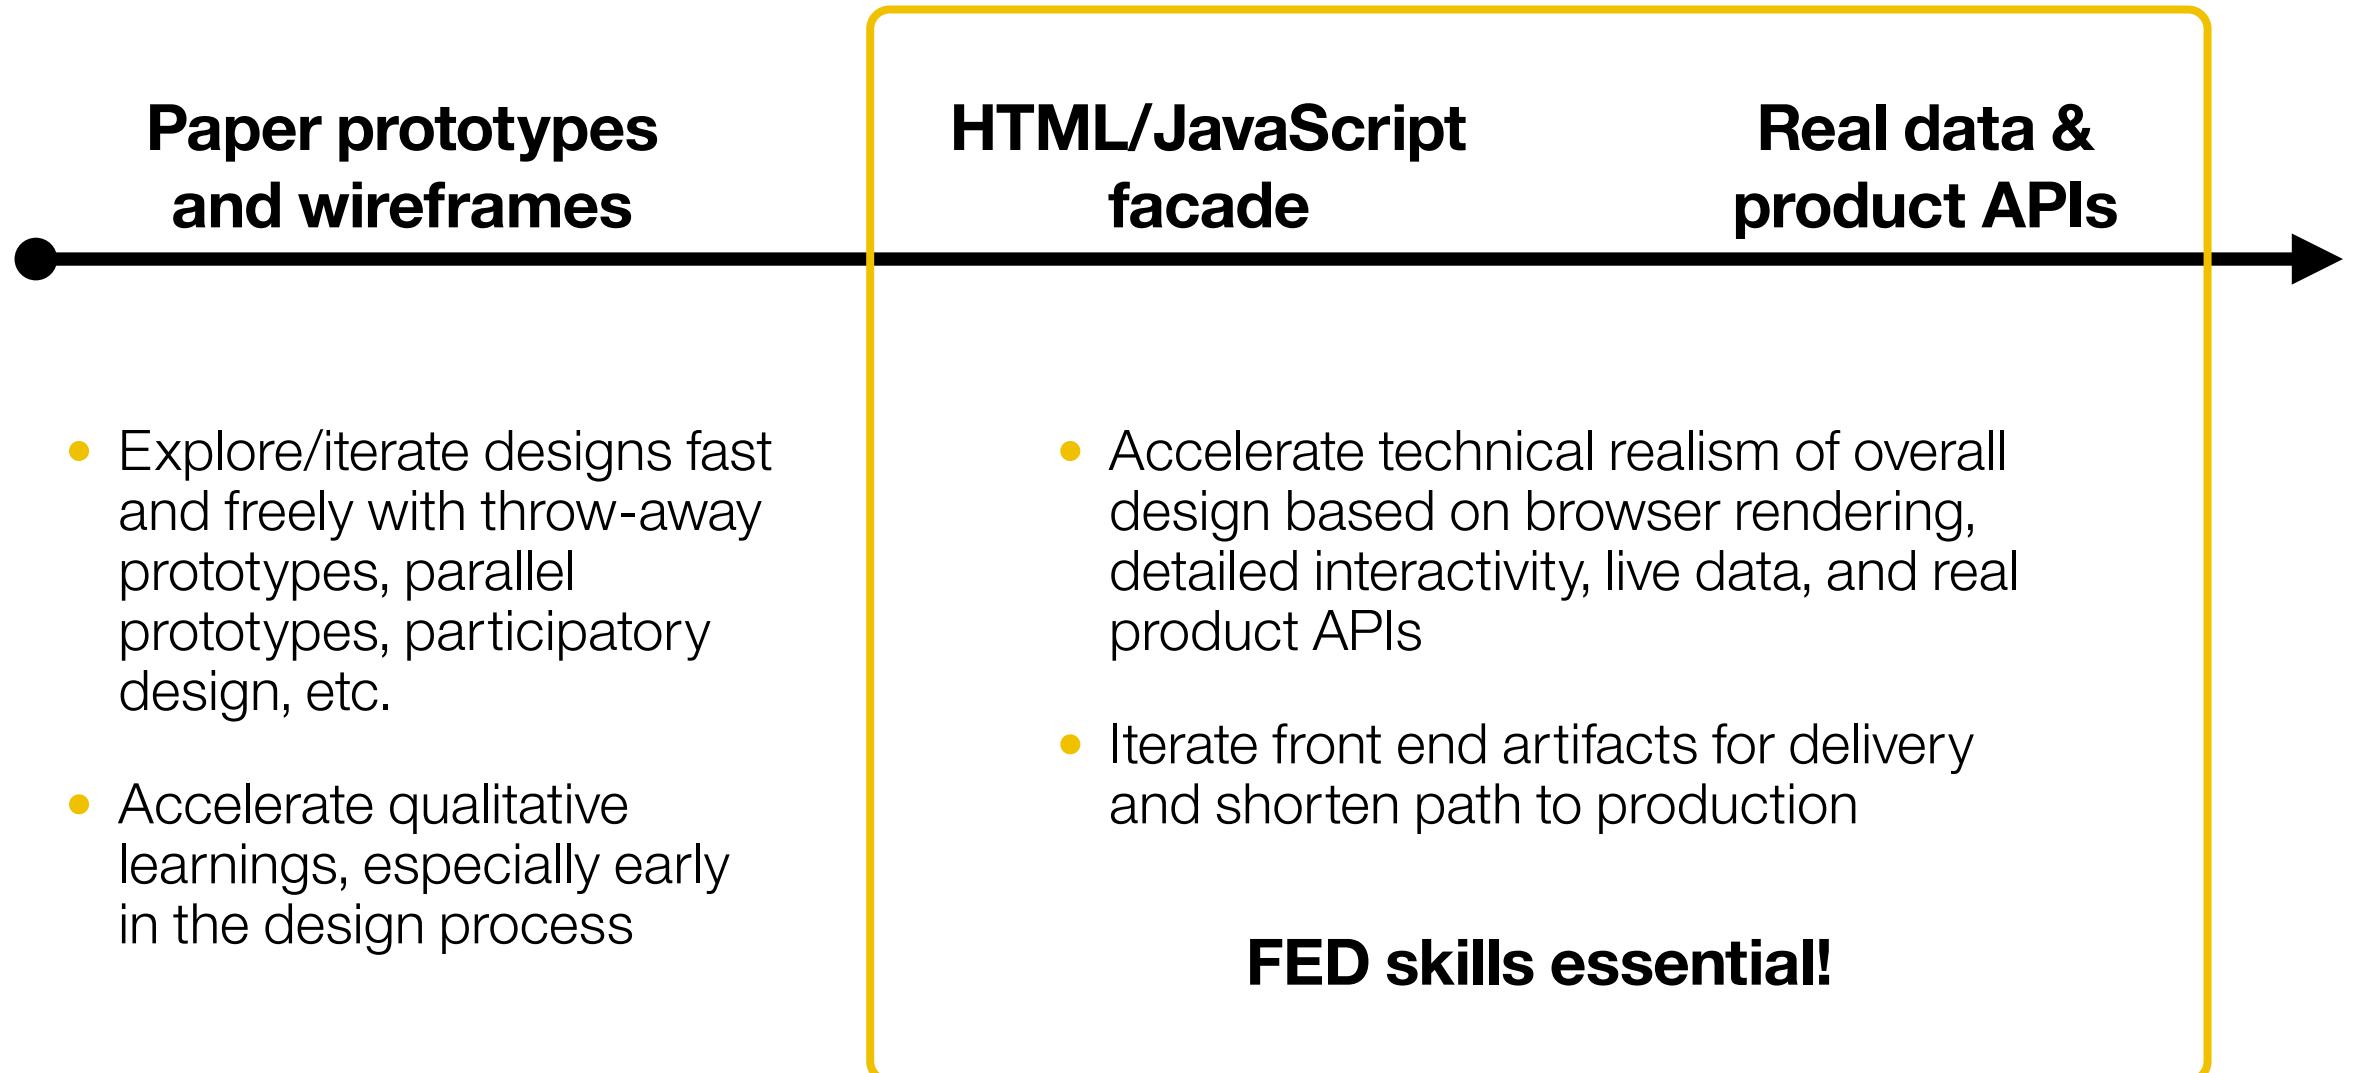

Prototyping + Delivery

Prototyping + Delivery

Prototyping + Delivery

FED personas we have experienced

- The newbie: Recent graduates with design orientation and technical interest
- The newbie*: Designers becoming developers
- The webhead: Web site programmers/stylists – new or veteran
- The coder: Veteran programmers changing focus from app or product development
- The technologist: Always looking ahead to the next approach or framework

The newbie – and things we look for

- Recent college graduates
- Computer Science degrees with a front-end focus (example: Computational Media from Georgia Tech)
- Minor or dual major in graphic design or humanities, illustrating knowledge of visual design and/or an ease in communicating with others
- Internships where front-end development or design was a key element
- Collaborative projects with other comp sci graduates, for example, working with other students to develop an iPhone App where “the newbie” was the UX focal point
- Knowledge of basic technologies (HTML 5, CSS, JavaScript), plus at least awareness of the current front end frameworks (Angular, ReactJS, etc.)
- Mobile development experience is a bonus

The newbie*

- Interaction designers who want to change focus
- “T-shaped” interaction designers who realize they are technical
- Designers who like to build advanced prototypes in tools like Axure and want to take it to the next level
- They are fascinated by technology and learning the latest and greatest, but always interested in the UX.

The webhead

- Deep skill and experience with HTML, CSS, JavaScript
- Works on web sites or existing browser-based deliverables
- “the GUI person” - specializes in the visuals vs. the interactions
- Tends to have expertise with responsiveness, accessibility, animation, reusable components
- Agnostic - Doesn’t tend to get locked into specific frameworks

The coder

- Veteran programmers/application developers who want to change focus or specialize
- Not as adept with design choices – “the doer”
- Deeper experience with tooling, build processes, code repositories, product APIs, testing environments
- More likely to be interested in iOS/Android prototyping and development

The technologist

- Always looking into the next front-end framework or mobile development approach
- Excited to work with the product architects on the next holistic approach
- Can either be ahead of the product team on what direction to take, or in the perfect spot to help them
- May be hard to keep happy on a long-term project

Roles for our FEDs

- Entry and junior-level FEDs
 - Individual contributors
 - One or two project assignments
 - Work within a design team
 - Work within a product team on specific front-end tasks or mobile development
- Veteran and senior-level FEDs
 - Individual contributors +
 - Multiple assignments, or leadership role on a single big project
 - May lead a design team or FED team
 - Sets best practices for the FED team and/or the product team
 - Lead liaison role on a product team for UX deliverables
 - Eminence in the larger community of FEDs across the IBM corporation and in local labs.

A photograph showing two construction workers in hard hats and safety vests reviewing architectural blueprints spread out on a table. One worker is pointing at the plans while the other looks on. The background is a wooden wall.

How do FEDs collaborate with interaction designers?

- xxx

A close-up photograph of a porcupine's head and upper body. The porcupine has dark, coarse fur and numerous long, light-colored quills standing upright across its back and neck. It is looking directly at the camera with a neutral expression. The background is blurred, showing green foliage and sunlight filtering through leaves.

How do FEDs work
with traditional
Engineering?

- Be clear about responsibilities and expectations
- What level of code are the FEDs responsible for?
- Look to the future. Provide patterns that can be followed.

Building on the lessons: IBM Verse

What is IBM Verse?

- IBM Verse is an email and business messaging experience with an innovative user-centric design, including social analytics and advanced search capabilities. IBM Verse helps users quickly find and focus on what content is most important, empowering them to build stronger working relationships while optimizing business results.
- An experience where several FEDs were committed to delivering production code
 - An extended commitment, that has involved bugs
 - Working on subsequent releases

Building on the lessons: Project Toscana

What is Project Toscana?

- Small team collaboration
- Project Toscana is IBM's solution for conversational collaboration.
- It is an enterprise-grade software-based system of engagement
- Designed to provide concurrent, real-time communication and collaboration services for small internal and cross-organizational groups of people.

ZetaWear Launch
Chris Crummey, do you have anything from the latest shoot we...

Project Teal
I also think we may need to review the doc

Greenwell Design
Sounds good, I'll begin to make the changes

TODAY

 ZetaWear Launch.pptx

 Dan Misawa 10:48 AM
I thought you said you wanted a different opening image?

 Sarah Gibbons 10:49 AM
Chris Crummey, do you have anything from the latest shoot we could use?

You uploaded a file 10:50 AM

Amy Blanks 10:46 AM
We're starting to see some buzz
on the social media sites already.

Glen Cloud 10:46 AM

Is [Sarah Gibbons](#) going to post
the launch presentation soon?

Dan Misawa 10:46 AM

I'm talking to them right now.

To Sum Up

- FEDs have a variety of backgrounds, from traditional university degrees to experienced coders with an interest in design
- FEDs provide guidance to interaction designers on the feasibility of designs and assist in communicating, and building, those designs with traditional engineering

Front end developers realize the design vision in code

Thank You
